

Adjunct Research Track

Adjunct Research Faculty appointments are made when an individual's primary employment responsibilities lie outside the University. This appointment indicates that the individual is working for a limited portion of his/her time (part-time) on a research project housed in the University of Michigan Medical School.

Adjunct Associate Research Scientist: Appointment or promotion to this rank requires a growing national and/or international scholarly reputation. Independence in research is not required, but may be developing as represented by a substantial record of collaborative funding as a team scientist (usually as co-investigator). There should be a strong and sustained record of publication in peer-reviewed journals, including a number of first-author and/or senior-author publications and evidence that this accomplishment will continue. A candidate for this rank should have a record of participation in or presentation at professional meetings. Appointment or promotion to Adjunct Associate Research Scientist signals the passage into medical academia's senior rank.
