

## **Visiting Research Track**

Appointees to this track *must* have employment responsibilities with another institution of higher education and are usually on leave from that institution. (e.g. here for a six month sabbatical.) Visiting Research Faculty appointments indicates that the individual is working for a limited portion of his/her time (part-time) on a research project housed in the University of Michigan Medical School.

**Visiting Research Scientist:** Appointment to this highest rank in the Research Scientist Track requires an internationally recognized record of continued excellence in research productivity and contributions. A Visiting Research Scientist will have a sustained record of first-author and/or senior-author publications in peer-reviewed journals. A Visiting Research Scientist will have served as principal investigator on center grants, major grants (e.g. NIH R01) or equivalent. A significant and sustained record of participation in relevant professional meetings is expected of a Visiting Research Scientist.
